01:08:54 Amy McQuillan: I know I can't eat much
anymore. Taking cloud and grounded lately has been so
affective. Not coffee and taking all the right
supplements for what resonate for me is what's working.

01:09:16 Ryan Baggett: From Wikipedia: "In
physics, a quantum (plural quanta) is the minimum
amount of any physical entity (physical property)
involved in an interaction. The fundamental notion that
a physical property can be "quantized" is referred to
as "the hypothesis of quantization".[1] This means that
the magnitude of the physical property can take on only
discrete values consisting of integer multiples of one
quantum.

For example, a photon is a single quantum of light (or
of any other form of electromagnetic radiation).
Similarly, the energy of an electron bound within an
atom is quantized and can exist only in certain
discrete values. (Atoms and matter in general are
stable because electrons can exist only at discrete
energy levels within an atom.) Quantization is one of

the foundations of the much broader physics of quantum mechanics. Quantization of energy and its influence on how energy and matter interact (quantum electrodynamics) is part of the fundamental framework for understanding and describing nature."

01:09:28 kim c: Jason's technologies are so amazing! And I love Glen's scientific understanding and explanation of quantum healing.

that we are this little outlet, one particle, of this
massive flow of particles In the entire universe. As I
understood that, I began to understand that there are
different aspects and different experiences. Imagine it
as a multi dimensional clock work. That there are these
parts that work in between, through and alongside each
other to bring the time into being. If we were talking
about YOU, it would be photons, fractals, DNA, all
working through , in between, etc. for us to exist in
this reality. You are the clock that others see, but
behind the clock is the entire mechanics that bring you
into being. When everything aligns and humanity is
ready, then we show up as our pure intention and
manifestation of our essence.”

Spiritual traditions

Connecting to energies
Energy starts with the physical the body
The physical body is the beginning of consciousness

The energies:
Spiritual energy isn't easily studied by science
because of its nature
Ectrum of energy

Quantum levels are becoming more understood
Mostly theoretical
That we are able to realize our quantum potential

Mainstream consciousness/ science
Everything is perceived from the physical body/
consciousness
01:18:37 JOY Megas: Two parts of science:

- MATTER
- ENERGY

The position that the matter is the source of the
energy is traditional scientific perspective

The position that the energy is the source of the matter is the quantum scientific perspective

The technologies that work on the spiritual levels:

- Meditation
- Divining
- Dancing
- Music
- Orgasm
- "The wall" in exercise

Glen's focus has always been on healing:

- Biochemical level is what western science works to find cure
- Energetic level is what quantum science works to heal

QUANTUM ENTANGLEMENT

When the observer becomes the focal point
The power we inherently have
Technology is here to show us how powerful we are

DNA can broadcast this energy into the cells
When Glen does visualization, he visualizes the energy
coming through the DNA into the body.
At the level of our intention, and our ability to
visualize our energy into manifestation.

We superimposed into this quantum and something
energies.
There has to be resonance with the internal processes,
everyone's unique, those internal processes have to
resonate with the external resonance that exists in the
material plane. There has to be some kind of exchange
of information.

Glen studied the effect of EST (Jason's company) on DNA
Studied the electrical properties of DNA
Measuring the energy of the DNA
Both external and internal
"Electrical measurements"

That facilitates the exchange of information
01:52:54 JOY Megas: Heart math focused on the
internal processes.

With intention, using the magic word LOVE.

One or the other does NOT work.

Glen was able to conclude that one needs both the
intention and the love.

By studying, Glen was able to observe: scalar, quantum
and energetic measurements
Most studies give approximately 30% change as known
currently in scientific literature.
Jason's invention has varied change from very small to
very large.
